CUSTOM **ES1**

Westone® Elite Series™

- The pinnacle of professional in-ear monitoring solutions
- Micro balanced armature driver design
- Fully custom fit, customizable looks, hand-crafted in Colorado, USA

Built to the same exacting standards as all Elite Series monitors, the ES1 offers Westone performance and sound at a lower price. The ES1 provides unexpectedly high sound quality from a single driver and 25dB of ambient noise reduction.

ES1 Specifications

SENSITIVITY:	114 dB SPL @ 1 mW
FREQUENCY RESPONSE:	20 Hz - 16 kHz
IMPEDANCE:	25 ohms @ 1 kHz
PASSIVE NOISE ATTENUATION:	25 dB
DRIVER:	Balanced armature, full-range
CABLE:	EPIC removable cable
CABLE LENGTH:	50" / 128 cm
BODY:	Acrylic with Flex Canal
FEATURES:	Deluxe monitor case, cleaning tool, desiccant drying compound, cleaning cloth, bottle of Oto-Ease, users manual, and 1-year warranty

Designed and engineered in Colorado, USA

HIGH PERFORMANCE EARPHONES

Ideal for:

On-Stage Monitoring, Personal Listening, Field Recording, Emerging Artists , Worship Teams

Westone Custom-Fit Technology

Fully custom earpieces are cast, sculpted, and polished by hand from actual impressions of your ears, resulting in the best fit and acoustic seal possible.

Balanced Armature

Westone's balanced armature drivers are significantly more compact and efficient than traditional dynamic drivers. By combining multiple balanced armature drivers with sophisticated crossover networks, Westone monitors provide enhanced sonic detail and frequency range that extends well beyond typical in-ear solutions.

Flex Canal

FLEX CANAL

A body temperature-reactive, semisoft earpiece canal additive that stays firm at room temperature for ease of insertion and then softens at body temperature, allowing increased comfort and acoustic seal for incredible noise isolation.

Cold Pour Acrylic

Earpiece housings are cold-poured in acrylic for a thicker, more resilient acoustic enclosure. Expect increased durability, a more controlled response, and a lustrous appearance from this Westone technology.

EPIC Removable Cable

Westone's robust EPIC cable is constructed of bifurcated, high-flex, ultra-low resistance tinsel wire, reinforced with a special aramid fiber, and braided for ultimate durability, acoustic transparency, and isolation from mechanical cable noise. The 2-pin audiophile connector makes this solution conveniently user-removable and replaceable.

Made in the USA

Meticulously built by a staff of dedicated artisans and lab techs, Westone's USA products exhibit a level of craftsmanship that truly embodies America's rich history of handmade artistry.
