DefendEar Digital Hunter

The Digital Hunter offers two DSP programs user selectable by pressing a button at the top of the digital module.

- NORMAL MODE gunshot noise suppression and ambient sound amplification for communication and environmental awareness.
- WIND REDUCTION MODE increases the amount of wind noise suppression—ideal for open field hunting and other severe conditions.

Technology:

Westone Custom Fit

50+ years of expertise making custom products for the ear.

Medical Grade OtoBlast Silicone*

Custom earpieces are formulated to optimize biocompatibility, attenuation, comfort, fit, and durability.

Modular Design

DefendEar Digital field-removable electronics allows for easy cleaning, service repairs, or future upgrades.

Advanced DSP (Digital Signal Processing)

Exceptionally accurate and lightning fast, DefendEar Digital's active, digital circuitry delivers unsurpassed amplification for situational awareness and appropriate noise attenuation when you pull the trigger. Features include:

- Digital Compression and Signal Processing circuit
- Volume Control
- Low Battery Warning
- Slick-Sil AM™

A chemically bonded coating for silicone earpieces is proven to be 99.99% effective against bacteria, germs, and other pathogens.

• Multiple Color Options

A wide range of colors are available from discrete skin tones to high-visibility colors as well as several combinations to meet unique personal taste or application requirements.

Battery life: approximately 150 hours.

 $^* \ We stone \ Oto Blast \ material \ compatibility \ tested \ according \ to \ MIL-STD-810F \ by \ an \ independent \ NIST-NVLAP/OSHA \ NRTL/DSCC/NCCCB/A2LA \ accredited \ laboratory.$

Otoblast has passed testing according to ISO Standard 10993: Biological Evaluation of Medical Devices Part 10, Tests for Irritation & Delayed Hypersensitivity Biological Evaluation of Medical Devices Part 5, Tests for In Vitro Cytotoxicity
